

BINTRAC® Vision

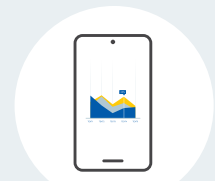

- ▶ Remote Monitoring – Cellular or Internet
- ▶ Cloud-Based Data Retention for Last 6 Months
- ▶ Easy Access to Feed Levels, Usage and Fill Events
- ▶ Historical Graphs and Custom Query Reports
- ▶ Email/Text Alerts for Fill Events and Low Usage

INTEGRATORS

FEED MILLS

GROWERS

IMPROVE LIVE WEIGHT PREDICTABILITY

Forecast weights based on actual consumption data

MANAGE ANIMAL HEALTH

Monitor feed consumption variances to identify health issues

BINTRAC CLOUD

Interface into enterprise data software

SAFETY

Stop climbing bins

MANAGE PHASE FEEDING COMPLIANCE

Assure phase feeding compliance through delivery and slide management

IMPROVE FEED MILL PERFORMANCE

Optimize production runs, reduce delivery costs, emergency orders and eliminate feed out events

PROCESS CONTROL

Improve your performance and bottom line

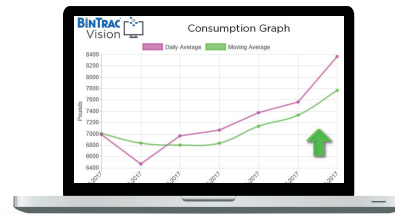

BIOSECURITY

Reduce feed deliveries, eliminate physical bin inventory checks

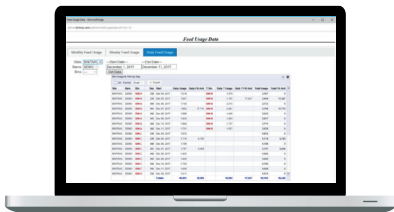

BIN GRAPHS

- Tandem or single bin level and usage graphs
- Identify silage management issues
- Ensure phase feeding compliance
- Easily identify bridging and feed line issues

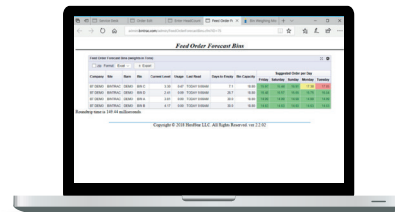

CONSUMPTION GRAPH

- Daily average consumption per animal, bin or barn/house
- Moving 3 day average consumption
- Identify whether consumption is trending up or down
- Live weight predictability

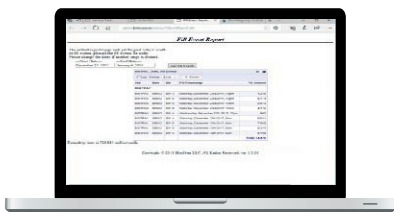

FEED DATA USAGE

- Shows daily, weekly and monthly usage for up to 6 months
- Tandem or single bin
- Feed delivery verification
- Ensure overall animal health

FEED ORDER FORECAST

- 5 day predictive orders based on usage and bin capacity
- Available by bin or barn
- Color coded based on days to empty
- Eliminate emergency feed orders

FILL EVENT REPORT

- Track feed delivery for the last 6 months
- Verify feed is delivered to the correct bin and site

BINTRAC VISION MOBILE

- Mobile partner to BinTrac Vision
- Access to feed levels, days to empty, usage and fill events
- Monitor current bin levels, 24 hour and 2 day usage graphs
