

## HOPPER Batching System

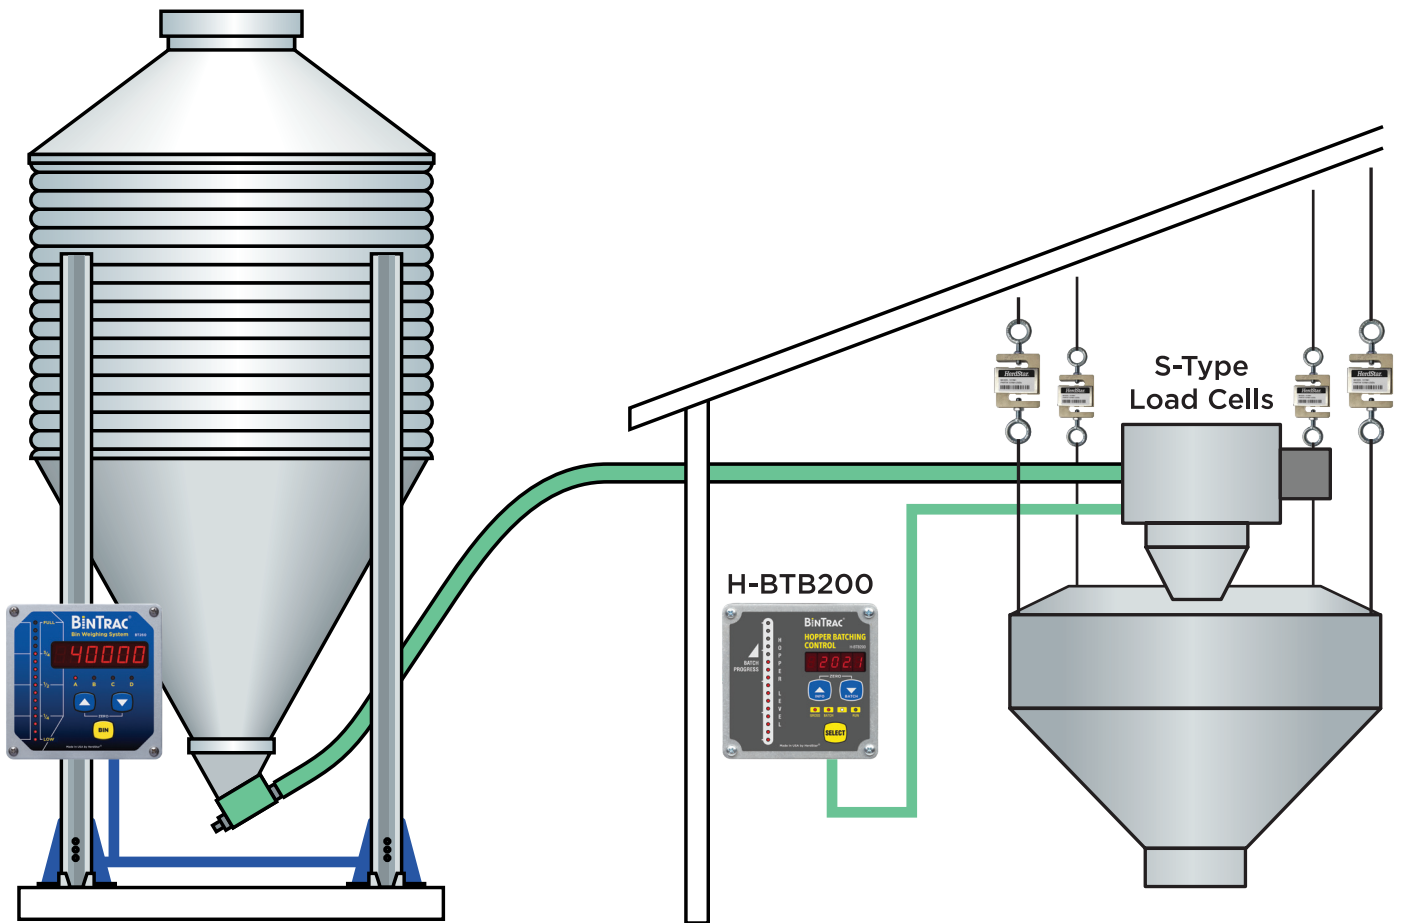

*Self-learning, early shut-off detection for free-fall to optimize batching accuracy.*

Load Capacity  
250 or 500 lb

### Batching Control Features:

- ▶ Accurate, reliable, and easy to operate
- ▶ Displayed resolution to 0.1 lb increments
- ▶ Automated schedule or manual batching
- ▶ Auto/manual relay and switch
- ▶ Controller displays
  - Current hopper weight
  - Batch progress
  - Batch history
  - Daily usage

## Inventory Bin with Single Batching Configuration

*(Hopper Load Batch Method)*

The H-BTB200 Hopper Batching Controller is connected to a single weigh hopper equipped with BinTrac load cells. This combination creates a highly accurate, precision batching system that can display the target batch amount and feed hopper weight in 0.1 lb increments. The above illustration shows an optional scale on the outside inventory bin which is not required as part of a Hopper Batching system.

*\*NOTE: Only one BinTrac Batching controlled auger system may be engaged at any given time.*
